

Week 15 Classwork/Homework Assignment

John Vinson

11/27/2017

For the assignment, you will submit the compiled pdf document. Make sure that the compiled documents will display all the required code to get your results.

The assignment is due Tuesday December 5 at 3:30 PM.

For this assignment, you are to reflect on your learning throughout the course. In two-pages, discuss the following questions/prompts:

- Has the course changed the way you think about mathematics?
- What are your thoughts about how we use mathematics in ecology?
- Have your problem-solving skills changed having completed the course?
- Do you feel that the course prepared you for future classes and/or jobs?
- What was the most difficult topic we covered in the course? How did you approach these topics?
- What is the most valuable topic/thing that you learned through the course?
- Have you learned anything about how you learn by taking the course?
- How did having both videos and readings influence your comprehension of the weekly topics?
- Did classtime dedicated to working problems and addressing questions influence the way you learn?
